

Outline and Objectives

2022 ICLRS – Iowa Essentials

IA Rules and Ethics

Presenter: Joseph S. Ferezy, DC

Fellow of the Int'l Academy of Chiropractic Neurology
Diplomate of the Int'l Board of Chiropractic Neurology

Video Narrated Slides - 2 CEU

Description:

This class will explore the Iowa Legislation laws that define the practice of chiropractic in the State of Iowa, as well as the Rules promulgated by the Iowa Board of Chiropractic. It will cover website location, navigation and use as well as highlighting points of concern to the typical practicing Doctor of Chiropractic in Iowa. It will cover all aspects regarding chiropractic practice in the State of Iowa as well as offer salient examples and opinions.

Objectives:

1. List requirements for chiropractic license acquisition and renewal in the State of Iowa, including continuing education requirements.
 2. Locate and navigate the “Laws and Rules” portion of the Iowa Board of Chiropractic Website.
 3. Identify ethical concerns in chiropractic practice and grounds for discipline by the Iowa Board of Chiropractic.
 4. Locate and navigate the Iowa Department of Public Health Website for Mandatory Reporting.
-

Professional Boundaries

Presenter: Amy L. W. Horton, DC, DIBCN, FIACN

Fellow of the Int'l Academy of Chiropractic Neurology
Diplomate of the Int'l Board of Chiropractic Neurology
Associate Clinical Professor Northwestern Health Sciences University

Video Narrated Slides - 1 CEU

Description – this course is designed to cover situations in professional boundaries. The class will consist of a series of slides that depict situations that might challenge professional

boundaries and cover different common doctor-patient scenarios. A discussion of options for handling various types of professional boundaries will be discussed.

Objectives:

1. Define and articulate boundaries in terms of a proper doctor-patient relationship.
 2. Determine circumstances where boundaries may be more fluid vs non-negotiable.
 3. Explore and navigate various doctor-patient boundaries situations in a professional manner.
-

Recognition of Child and dependent adult Abuse.

Presenter: Joseph S. Ferezy, DC

Fellow of the Int'l Academy of Chiropractic Neurology
Diplomate of the Int'l Board of Chiropractic Neurology

Video Narrated Slides - 1 CEU

Description – NOTE: THIS CLASS DOES NOT FULFILL OR APPLY TOWARD IOWA MANDATORY REPORTER REQUIREMENTS. View video excerpts of experts in the field as Dr. Ferezy discusses salient points and specific state reporting requirements and procedures regarding the recognition of child abuse. This class covers physical and radiographic evidence of injury to children, social and psychological aspects of child abuse, and a discussion of hypothetical and real situations regarding child abuse. Also discussed are legal implications for abusers, and for mandatory reporters. This class is a concise, yet broad based discussion of the horrors of child abuse and your role, as a Doctor of Chiropractic in these cases.

Objectives:

1. Recognize physical signs of child abuse.
 2. Identify behaviors associated with abused children as well as their abuser(s), enablers and other victims.
 3. Recite basic methods to recognize child and dependent abuse;
 4. Understand and implement abuse reporting criteria relevant to the state that you practice chiropractic.
-

Cervical Adjustment and Stroke

Presenter: Joseph S. Ferezy, DC

Fellow of the Int'l Academy of Chiropractic Neurology
Diplomate of the Int'l Board of Chiropractic Neurology

Video Narrated Slides - 1 CEU

Description:

This brief class will update the chiropractic practitioner relative to the issue of neck manipulation and associated vertebrobasilar ischemia (stroke). It will include basic conclusions about association versus causation, as well as review recent salient additions to the literature in relation to the subject, including any relationship to Covid-19 infections.

Objectives:

1. Cite recent literature articles related to the issue of neck manipulation and associated vertebrobasilar ischemia (stroke).
2. Discuss the role of cervical manipulation relative to the issue of association versus causation.
3. Discuss the role of Covid-19 infection in vertebrobasilar ischemia (stroke).
